

Falcon PD™

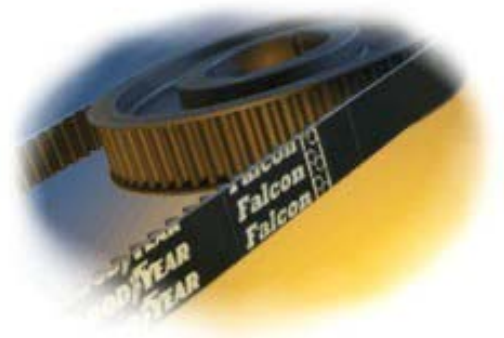

GOODYEAR

A drop-in replacement for the Gates Poly Chain GT2* polyurethane belt.

Goodyear's rubber Falcon Pd® belt can provide current Poly Chain GT2* users with a convenient, "drop-in" belting alternative. Designed to fit Poly Chain sprockets, Falcon Pd delivers real value with each application.

- Exceptional tensile strength for premium performance.
- Rubber construction for better resistance to flex fatigue.
- Backside idler compatible when needed.
- Tests show 1dB to 4dB quieter operation than comparable Poly Chain GT2 belts.
- Versatility in a wide range of operating temperatures.
- Size-for-size "drop-in" convenience.

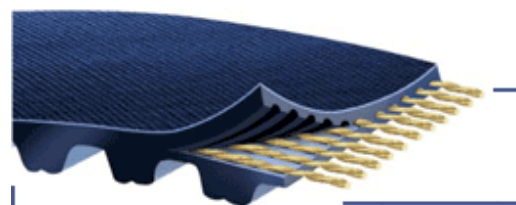

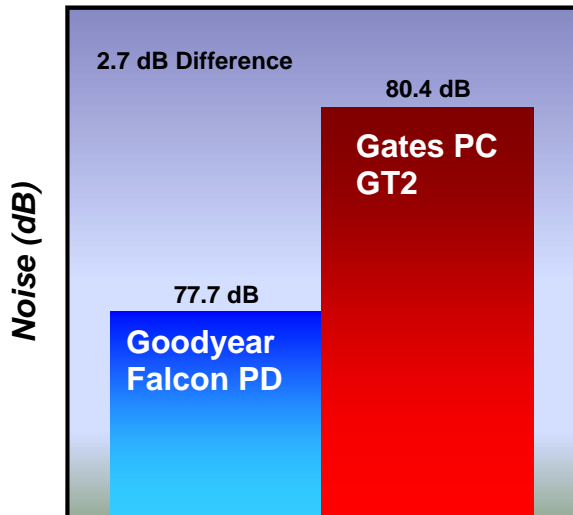

Part crossover example:

Goodyear 640-8GTR-21 = 8MGT-640-21

Falcon PD Sprockets are also available. Please contact sales for more details.

Falcon PD™ is the latest in Goodyear's family of synchronous belts, available in 8mm and 14mm. So "Don't just replace your belts, replace your brand. Because a better belt is a better investment."

Typical Application Noise Levels

Tooth Composite

- Patented Compound
- Static Dissipating Facing
- Abrasion Resisting Facing
- Excellent Thermal Performance

Tensile Member

- Patent Pending Cord Treatment
- Proprietary Adhesives System
- Excellent Dynamic Adhesion
- Engineered Aramid Construction
